Experience

Software Engineer (Full Time)

Astrikos.AI

Bangalore

Jul 2025 – July 2026

- Built an agentic layer over the datacenter analytics platform that helps operators make decisions and acts proactively.
- Automated sensor data ingestion from industrial historians, then tuned TimescaleDB to cut analytics query times.
- Owned deployments on AWS and offline on-premise.

Software Engineer (Intern)

Astrikos.AI

Remote

Apr 2024 – Jun 2025

- Built a flow engine that runs Python code dynamically through a node-based system.
- Developed a full stack console for global datacenter operations, driven by real-time telemetry.

Software Engineer (Intern)

Recepto.AI

Remote

Nov 2024 – Mar 2025

- Built the core lead pipeline: scraped LinkedIn at scale, classified posts to drop irrelevant ones early, matched the rest against each client, and enriched those leads with contact details.
- Shipped full stack features alongside the founders through the product's early stage.

Software Engineer (Intern)

Repello.AI

Remote

Mar 2024 – May 2024

- Worked on the attack engine of an automated LLM red teaming platform: prompt injection, jailbreaking, encoding-based filter bypasses, and system prompt extraction.
- Worked full stack on the platform, including findings report generation, and manually red teamed emerging AI products.

Open Source Contributor (Google Summer of Code)

Wikimedia Foundation

Remote

May 2023 – Aug 2023

- Built end-to-end tests for core Wikipedia user journeys and fixed bugs in the codebase.

Projects

- **Mini-pi (Coding Agent)** [🔗](#): Coding agent built from scratch and published on PyPI, with sandboxed tools, session persistence and branching, context compaction, hooks and extensions. Grew out of [tinkering with harnesses](#) [🔗](#) on SWE-bench Verified, with OpenTelemetry tracing and LLM as a judge trajectory evals.
- **Variational Autoencoder on Google QuickDraw** [🔗](#): Trained a VAE from scratch using a standard architecture to generate and interpolate hand-drawn sketches.
- **Bhagavad Gita Conversational AI** [🔗](#): Assembled the dataset by scraping sites, OCR on scanned books, and YouTube transcripts, then fine-tuned Gemma-3-1B-IT on RunPod.
- **Shopmate** [🔗](#): Multi-step LangGraph agent that asks clarifying questions first, then scrapes Amazon, Flipkart, and Google Search to compare products and return the top three matches.
- **Election Portal** [🔗](#): Campus-wide elections platform at IIT Roorkee, where 10K+ students voted within a 2 hour window. Built tamper resistant voting and ran the AWS infrastructure through that peak load.

Extracurricular Activities

- **Finalist (Top 100 of 2000+), OpenEnv India 2026** [🔗](#) (Hugging Face, Meta PyTorch), May 2026: Built MedChain, an RL environment for hospital supply chains.
- **Runway API Hackathon** [🔗](#), May 2026: ReelAgent, an agent that turns a YouTube link into a reaction reel.
- **Top 5 in the healthcare track, Google Gen AI Hackathon India** [🔗](#), Oct 2024: GenAI app that segments tumors from MRI scans and writes diagnostic reports with treatment plans.
- **Project Manager, MDG Space (Technical Club), IIT Roorkee**, 2022 – 2025: Led technical projects end to end and ran workshops for 100+ students.

Education

Indian Institute of Technology Roorkee, B.Tech in Chemical Engineering

Nov 2021 – Apr 2025
